

Marble Care and Maintenance

Marble must be sealed annually. Using a top quality sealer such as Glaze-N-Seal is recommended to protect your investment. Blot up spills of any kind immediately. Daily cleaning should be done with hot water and a non-abrasive sponge. Dry off with a soft cotton cloth or chamois. You can use a mild soap occasionally, as too much use will dull the stone. Bottles, cans, glasses, and even water can leave rings, so always use a coaster.
